Risk Summary

Investors should carefully review the Offering Circular, including its discussion of the risks the Company faces under "Risk Factors" beginning on page 12, which include but are not limited to:

- An investment in the Company involves a high degree of risk and is illiquid. An investor could lose all or a substantial portion of their investment.
- We recently withdrew our election to be regulated as a BDC and do not have a significant operating history under our new investment objectives. There is no assurance that we will be able to successfully achieve our investment objectives.
- Investors will not have the opportunity to evaluate or approve any Investments prior to our acquisition or financing thereof.
- Investors will rely solely on the Adviser to manage the company and our Investments. The Adviser will have broad discretion to invest our capital and make decisions regarding Investments.
- We may not be able to invest the net proceeds of this offering on terms acceptable to investors, or at all.
- Investors will have limited control over changes in our policies and day-to-day operations, which increases the uncertainty and risks you face as an investor. In addition, our Board of Directors may approve changes to our policies, including our policies with respect to distributions and redemption of shares without prior notice or your approval.

- There is no public trading market for our preferred shares, and we are not obligated to effectuate a liquidity event or a listing of our shares on any nationally recognized stock exchange by a certain date or at all. It will thus be difficult for an investor to sell the shares.
- We may fail to maintain our qualification as a REIT for federal income tax purposes. We would then be subject to corporate level taxation and regulation as an investment company and we would not be required to pay any distributions to our stockholders.
- The offering price of our shares was not established based upon any appraisals of assets we own or may own. Thus, the initial offering price may not accurately reflect the value of our assets at the time an investor's investment is made.
- Substantial actual and potential conflicts of interest exist between our investors and our interests or the interests of our Adviser, and our respective affiliates, including conflicts arising out of (a) allocation of personnel to our activities, (b) allocation of investment opportunities between us, and (c) potential conflicts arising out of transactions between us, on the one hand, and our Adviser and its affiliates, on the other hand, involving compensation and incentive fees payable to our Adviser or dealings in real estate transactions between us and the Adviser and its affiliates.
- There are substantial risks associated with owning, financing, operating, leasing and managing real estate.
- The amount of dividends we are required to make under the Series B Articles Supplementary is 3% of the stated value, paid currently, and 9% of the stated value to be accrued until liquidation/redemption. However, there can be no guarantee that we will have sufficient funds from operations to fund these dividends. We may fund such dividends from offering proceeds, borrowings, and the sale of assets, although we expect that the dividends will be made from operations. To the extent dividends exceed our earnings or cash flows from our operations they may constitute a return of capital to our stockholders. Rates of dividends may not be indicative of our actual operating results.
